PRICE LIST FOR FALL, 1931

JAPAN ROSEFLOWERING CHERRIES is our leading specialty. We grow and sell probably more than ten times as many as any other nursery in America. Our trees are well spaced and frequently transplanted, the larger sizes mostly on own roots.

Our assortment is complete and covers all worthwhile varieties. There are dwarf sorts, columnar sorts, vase-shaped and spreading sorts, single or double, in 33 varieties. Our catalog on Flowering Trees describes thoroughly most of these varieties. If you do not already have a copy, ask for it.

CHINESE MAGNOLIAS—Varieties available are Lenni, Alexandrina, Soulangiana, Alba Superba, Liliflorum, Purpurea, etc.

The sizes range up to 10 feet in fair abundance, a few of each variety up to 12 feet—all very broad and bushy. If 8 to 10 feet high, they are generally from 5 to 8 feet wide. One lot of Soulangiana and Alexandrina are 9 feet high down to 6 feet high, all or nearly all as wide as high. Most of the 6 to 7 feet high M. Soulangiana were transplanted Spring of 1931. All sizes carry substantial balls.
